ABOUT ME

I'm a curious and motivated junior software developer who loves turning ideas into real, working applications. With a foundation in modern technologies like Java, JavaScript, PHP (Laravel), Tailwind CSS and Kotlin. I enjoy learning new tools and tackling challenges that push me to grow.

SKILLS

- **Languages:** PHP, JavaScript, Java, Kotlin, Python, SQL, HTML, CSS
- **Frameworks & Libraries:** Laravel, Filament, Tailwind CSS, ReactJS, Vite, Jetpack compose
- **Front-End Development:** Responsive design, basic UI/UX, component-based design
- **Back-End Development:** API, authentication, database design
- **Tools:** Git, GitHub, Docker, XAMPP, MySQL workbench, PostgreSQL
- **Soft Skills:** Problem-solving, teamwork, continuous learning, adaptability, good communication

PROJECTS

Inventory Management System

- Built a Web app to manage inventory tracking, loan, stock control.
- Integrated a role and permission for specific user.
- Technology : PHP Laravel, Filament, PostgreSQL

Coffee order app

- A coffee ordering app with a user-friendly interface for ordering coffee and picking up orders.
- User login, home screen, menu screen category filtering view detail add to cart and order checkout, history screen, account screen.
- Technology : Kotlin jetpack compose, Firebase, MVVM, OAuth

Loan prediction

- A machine learning model that predicts loan approval based on applicant data.
- Predict if a person's loan will be approved or not based on their details (Income, Loan amount, Credit history, Education, Assets Information).
- Technology : Python, Jupyter Notebook, Flask, Scikit-learn, Kaggle for dataset

Front-end Booking

- Website for booking ticket football match.
- User friendly interface, Web responsive, Searching and Filter.
- Technology : JavaScript (React+Vite), Tailwind CSS

EDUCATION

2021 – 2022 | Graduate the baccalaureate

2023 – Present | Bachelor degree of Information Technology Engineering (RUPP)

LANGUAGE

Khmer – Native language

English – Intermediate
