ABOUT ME:

I'm a curious and motivated junior software developer who loves turning ideas into real, working applications. With a foundation in modern web technologies like Java, JavaScript, PHP (Laravel), and Tailwind CSS, I enjoy learning new tools and tackling challenges that push me to grow.

PROJECTS:

Inventory Management System

My 3rd year Project

- Built a Web app to manage inventory tracking, loan, stock control.
- Integrated a role and permission for specific user.
- Technology : PHP Laravel, Filament, SQL

Front-end Booking Web app

Personal Project

- Website for booking ticket football match.
- User friendly interface, Web responsive, Searching and Filter.
- Technology : JavaScript (React+Vite), Tailwind CSS

CRUD-Inventory-system

Personal Project

- System for manage inventory, supplier, tracking low stock.
- CRUD operation, Auth(login & register), Friendly interface.
- Technology : Java GUI, MySQL

EDUCATION:

2021 - 2022 | Graduate the baccalaureate

2023 - Present | Bachelor degree of Information Technology Engineering (RUPP)

SKILLS:

- **Languages:** PHP, JavaScript, Java, Kotlin, SQL, HTML, CSS
- **Frameworks & Libraries:** Laravel, Tailwind CSS, ReactJS
- **Front-End Development:** Responsive design, basic UI/UX, component-based design
- **Back-End Development:** Basic API, authentication, database design (MySQL)
- **Tools:** Git, GitHub, Docker, XAMPP, MySQL workbench
- **Soft Skills:** Problem-solving, teamwork, continuous learning, adaptability, good communication

LANGUAGE:

Khmer - Native language

English - Intermediate
